

Chinninti Ashok Kumar

 Ashokkumar709 |  ashok-kumar-chinninti |  chinnintiashok555@gmail.com |  +91 8074210220

Education

2022 – Present B.Tech in Computer Science, **SRM University**, Amaravathi (CGPA: 8.58)

Skills

Programming Languages	C, C++, Java, JavaScript(ES6+), Python(Basic), HTML5
Frameworks & Libraries	Next.js, React.js, Node.js, Express.js, Tailwind CSS, Material UI, Restful API's
Databases	MongoDB, MYSQL, Redis
Tools & Platforms	Git, Github, Postman, Render, Docker
Core CS Concepts	Data Structures & Algorithms, OOPS, OS, DBMS, CN

Work Experience

Software Engineer – Inddev Ventures (Remote) May 2025 – July 2025

- Developed core features for AgentKart including onboarding, agent listing management, and appointment scheduling using MERN + Next.js.
- Built reusable UI components and dashboards, ensuring responsive layouts and smooth user/agent navigation.
- Designed and secured RESTful APIs with Express.js, MongoDB, JWT-based auth, and middleware-driven route protection.
- Integrated real-time communication with WebSockets for live chat and video consultation workflows.

Frontend Developer – Edunet Group of Companies (Remote) May 2023 – July 2023

- Developed responsive and interactive web interfaces using HTML, CSS, and JavaScript, ensuring optimal performance across various devices and browsers.
- Refined code to optimize application performance, leading to reduced load times and enhanced user experience.

Projects

Chat Application (MERN + Socket.io)  | React, Socket.io, Node.js, Express, MongoDB, Mongoose May 2025

- Built a real-time chat platform using **MERN + Socket.io** with instant, bidirectional messaging.
- Implemented secure authentication with JWT for login, registration, and session handling.
- Designed **RESTful APIs** for messaging and user management using **Express.js and MongoDB**.
- Optimized message storage and retrieval using efficient Mongoose schemas.

ReachInbox-Style AI Onebox for Real-Time Email Automation  | IMAP, Node.js, Redis, MongoDB

- Developed a production-grade Onebox Email Aggregation system supporting real-time multi-account IMAP sync using IDLE mode.
- Used **Redis + BullMQ** based job queues to optimize email ingestion and reduce indexing latency by 10×.
- Built an asynchronous worker service that reduced **MongoDB load by 65% through deduplication** and background processing.
- Implemented RAG(Retrieval-Augmented Generation) with LLMs to suggest replies.

QueueCTL – CLI-Based Background Job Queue System | Javascript, Node.js, Express.js, Commander.js May 2025

- Built a scalable job queue system in Node.js supporting 50+ concurrent jobs with persistent JSON-based storage.
- Implemented exponential backoff retries and a Dead Letter Queue (DLQ), reducing unhandled job failures by 70%.
- Developed a 10+ command CLI tool for enqueueing, worker management, configuration, and DLQ recovery.
- Created a lightweight monitoring dashboard that tracks 6+ job states and real-time worker activity, improving visibility by 80%.

Achievements

- National Finalist – **HackVYHA 2024**: Developed and presented a working prototype under tight deadlines, demonstrating innovation, teamwork, and adaptability.
- Solved **300+** coding challenges across platforms like LeetCode, CodeChef, and GeeksforGeeks, strengthening algorithmic problem-solving skills.
